

Homemade Frosty Paws

Ingredients

- 1 banana
- 1 q vanilla yogurt (Or add plain yogurt with vanilla extract.)
- 1 bn ice cubes
- 1 c peanut butter

Instructions

 Dump them all into a blender and let it whirl! I found that it went faster if the ice cubes and banana were on the bottom. It will give you 3/4 full blender of yummy liquid. Pour into dixie size cups and place on a cookie tray and let freeze. When frozen dump in bag if you need the space. My dog and its friends loved them!

 Hint- I used to do individual plastic ice cream containers since they were plastic and could be washed and reused. I thought it would be a treat you could make for furry guests while using stuff you probably already have hanging around. Wished I had thought about it earlier like this spring!
