

Chocafe Drizzle

Ingredients

1/2 c hershey's chocolate syrup
1 t instant coffee

Instructions

- For best results put the chocolate syrup in the microwave to make it warm (makes the instant coffee dissolve better).
- Add the instant coffee.
- Stir thoroughly until you can't see any solid particles of coffee.

Allowing the mixture to return to room temp or even slightly chilled makes it hold its form better once it is drizzled on the plate so it is recommended but not required.
